

6-Hour Safety Culture: How to Sustainably Reduce Human Error and Risk (and do what training alone cant (possibly) do)

How do you get workers to [consistently] do the right things at 3:00AM when no one else is watching? The answer to this question provides the ultimate (yet little understood) solution to rapid and sustainable improvement in safety, reliability, and efficiency. The great news is- its not complicated. In 6-Hour Safety Culture, Tim Autrey offers tangible insight into how to achieve and sustain next-level performance in any organization. Using stories and anecdotes drawn from his experiences within the US Naval submarine service, nuclear power generation industry, and as Founder/CEO of the Practicing Perfection Institute, Inc., he breaks down the underlying science of human performance into simple understandable chunks. He offers a great deal of simplicity on the far side of complexity. In Part I, you will be enticed to think different as Tim Autrey takes you on a journey of awareness into the world of human performance. Building upon a foundation of four simple precepts, and a four-part system for leveraging positive aspects of human nature, he then takes you into Part II, where you will learn how to truly influence the hearts, minds, and souls of your organization members. Moving from insight, to strategy, to action, Tim will teach you the Individual Performance Model, the same model used by leaders throughout history to influence human behavior and develop high levels of personal accountability. He then takes this model into the third dimension, providing a proven recipe for rapid and sustainable team, department, and organizational culture transformation. In Part III, you will learn to do different as Tim directly explores and develops the tenets of human error, safety culture, and just culture. He breaks through the hype, teaching you whats important (and what to avoid) in any performance improvement effort. He then develops a simple four-step recipe for

engaging organization members on an ongoing basis; a method that directly promotes alignment with organization principles and a one team approach to doing business. He ties everything together with the Human Performance Blueprint- a step-by-step implementation guideline for achieving and sustaining next-level performance within any organization. Tim wraps up the 6-Hour Safety Culture journey with a challenge- a challenge to you and everyone else who chooses to learn and take action. A challenge to make (as Steve Jobs put it) a dent in the universe; to truly help make your organization, and ultimately the world, a better and safer place.
