

## Everyday Experiences & How To Attract Success

Many Books and treatises have been written on the subject of Success and the methods to obtain it. The student applying them, has usually been successful for a while but the day invariably came when he or she found that something was lacking, and the methods which formerly brought success failed them in their need. In business it has always been considered that the salesman who could sell a customer something he did not want was the best. Men are taught Business Psychology, which consists in controlling the other fellows mind through the power of Mental suggestion and making him do what the salesman wants. The world has not realized that the Law of Force was the controlling factor in these methods and that we can only retain a thing under the same Law by which it is obtained. To be successful in anything one must be able to retain as well as obtain it; they must also be able to obtain it when they want it, where they want it, and be able to retain it as long as they want it. Few are able to maintain this Law of Force against all-corners for any great length of time, and so we have failure after failure. In this book is taught the true Law of Success: the Law of Harmonious Attraction. Under this Law, things come to us because they want to come, not because we make them come; they remain with us because they want to do so. Instead of working to control the other, we learn to control ourselves and become so strong, powerful and harmonious in our attractive power that the things we want will want us so much that they cannot remain away.
