

Drop Ship Empire: Exploit Drop Shipping to Build a Completely Hands-free eCommerce Business

Ecommerce is without question the most profitable online business venture in the world and will be for quite some time. Unfortunately, not everyone has a ton of cash lying around to spend on inventory, and dealing with warehouses, shipping, and logistics is enough to make anyone dizzy. Drop shipping allows you to bypass all of that headache and get started on a minimal budget, but like most things, its not as easy as it sounds. If youve ever attempted to get into ecommerce (drop shipping in particular), youve more than likely: - Wasted money on generic and saturated wholesale directories and lists - Wasted time waiting for buyers to actually find your products - Gotten drowned out by the immense competition on eBay - Finally made a sale, then turned to your supplier only to find the product is sold out - Gotten ripped off by middlemen who falsely advertise and mark up wholesale goods - Hopelessly struggled to compete against the giant online retailers (like Amazon) Ive been in the drop shipping industry for over 10 years. Ive seen and done it all - flipping merchandise from Walmart to eBay, importing from China, leveraging daily deal sites, you name it. It was a long journey full of ups and downs, but I went from barely scraping by to generating over \$30k/month in PROFIT. And all without a warehouse or a single employee. How did I do it? After years of intense research and (more importantly) a lot of trial & error, I finally managed to crack the drop shipping code. And once I did, I duplicated the same process over and over until I had built a full blown ecommerce empire. My system works in nearly any niche and can be rinsed and repeated as many times as I like. So what does this mean for you? It means youre in luck. Ive done all the leg work for you so that you can avoid making the same mistakes I did (and I made A LOT). Ive compiled my years of knowledge into a detailed but easy to follow business plan,

complete with step-by-step tutorials, software reviews, and every marketing trick Ive picked up during my long but successful journey. Heres a sample of what youll discover inside Drop Ship Empire: The five most common scams and pitfalls that nearly every new drop shipper falls into Insider product sourcing secrets that can get you the profit margins you need to succeed All the software you need to get your own ecommerce site up and running, no coding necessary Unbiased reviews of all the most popular drop shipping programs from industry professionals Over a dozen high traffic places where you can list and sell your products, totally free Search engine secrets that generate massive traffic and sales from Google Marketing software and tricks that get your products seen by thousands of hungry buyers How to ramp up your customer base by channel selling through sites like eBay and Amazon The Achilles heel of the major online retailers and how you can beat them How to accept credit cards and make payments simple, without all the expensive fees Plus a lot more!
