

The Authority of the State (Chinese Edition)

In this book, the author examines the nature of the state and political authority, successively, criticized the practice, contract theory, agreement theory and communitarianism to national evidence; Given that close connection between national authority and political obligation, the author also discussed the possibility of political obligation and obedience in the political meaning of life. On this basis, the author is skeptical about the national authority and general political obligation , but he clearly differentiate his position with anarchism, and think that this position does not mean we should not act in accordance with the requirements of the law in any cases. Around these core issues and basic stances, the author adopts plenty of examples and views, making a profound analysis and evaluation about these problems and many thinkers.
