

Louis MacNeice: In A Between World

This powerful new perspective on MacNeices life and work explores his poetry, prose and drama as part of a biographical re-evaluation: a certain knowledge of the poets personal background will help us to understand him, for his language is to some extent personal. These words, the poets own, have never been more fully realised in a single piece of work; Christopher Fauske places the poets relationship with Ireland, the Second World War, his father and the key women in his life at its centre, unravelling unprecedented considerations that challenge the critical foundations of this luminary of Irish writing. MacNeices experiences and poetry provide a fascinating intersection, illuminated further by his penetrating criticism and celebrated radio work. An unstable upbringing, ill-defined nationality and tempestuous love life ally themselves to a deeply uncertain body of work which, nonetheless, maintains a life-affirming poetic. Fauske engages product, process and material reality in this fastidious book that pays long-overdue heed to MacNeices heroic directive: Let every adverse force converge. [Subject: History, Irish Biography, Literary Criticism]
