

Creation or Evolution - Which? (Part 1) (Moments that Matter Book 5)

Moments That Matter is an essay series which provides short Bible-based answers to the important spiritual questions in peoples lives. There are two theories about origins. Those views are not compatible. One must be true. One must be false. The conclusion that we draw from the available evidence will lead us down one of two opposing paths about our purpose for living and even the worth of life. Those two theories are examined in Creation or Evolution - Which? This essay is the first part of a two-part introduction to the differences in these two world views. It takes a brief look at the available evidence and to which theory that evidence points. This discussion is one that every person must consider at some point in his life. If you have never taken a moment to open your mind to the evidence, this essay will provide one moment in your life that will truly matter.
