

I Wish It Would Rain

Memory should never be relied upon to establish fact. It is too selective. Bad memories hang around far too long. But they are essential. When bad shit happens to us it helps shape the future decisions we make. It helps shape who we are and who we become. Good memories can serve the same function if they do not fade too early. Then again, after they have faded, they can be brought back with a song, a smell, or a seemingly unrelated event. This is my memory of one rainy night I have never been able to forget.
