

SIX MONTHS WALKING THE WILDS (Of Western Europe): The Long Way to Santiago

Part comedy, part travelogue, meditations on life, love, and pastaSIX MONTHS WALKING THE WILDS (Of Western Europe) is a journal of the authors 2000-mile walk through Italy, France, and Spain tracing the historic pilgrimage known as El Camino de Santiago. His route begins in the heel of Italys boot and runs up through Rome and Siena, beside the sea at Cinque Terre, northward to Genoa. Skirting the Ligurian coastline, passing harbors of the rich and famous at Monte Carlo, the trail turns west across France and over the Pyrennees into Spain near Pamplona. From this point thousands of pilgrims walk the north of Spain each year, heading for the cathedral at Santiago de Compostela. Six months of the authors twists, turns, and trials converge with the stories of those who traveled from all over Spain, from many points of Western Europe, from countries all around the world.
