

## Solar energy and heat pump drying technology (Chinese Edition)

This book makes a comprehensive and systematic introduction to the basic knowledge to solar energy and heat pump drying, as well as solar energy of a variety of material and drying technology of heating pump. The main contents in this book include preface, basic knowledge of solar energy drying, solar collectors and heating system, solar energy accumulation device and its system, solar energy drying of agricultural products, solar energy drying of wood, solar energy drying of other materials, basic knowledge of heat pump drying and its applications. They are all written in a form of simple expression, and some theories and charts in this book are explained by some sample.
