

# Introduction to Nanotheranostics (SpringerBriefs in Applied Sciences and Technology)

This book offers readers an introduction to the current status of nanoparticles and other nanomaterials that have potential applications in theranostics. Above all, it highlights the diagnostic and therapeutic applications of metallic (e.g. Au, Ag), semiconducting quantum dots (e.g. CdSe, CdTe), magnetic (e.g. Fe<sub>3</sub>O<sub>4</sub>, FePt, Co), and multifunctional (combination of two or three) nanoparticles.
