

Semi-insulating III-V Materials, Malmo 1988, Proceedings of the 5th Conference on Semi-insulating III-V Materials, Malmo, Sweden, 1-3 June 1988

The 5th Conference on Semi-insulating III - V Materials was held in Malmo, Sweden, during June 1988. It followed the traditions of previous conferences in penetrating and documenting current issues in the science and technology of semi-insulating materials, and in promoting cross-fertilisation of ideas between materials scientists, physicists and device applications engineers. This volume contains contributions from the following areas in which there has been significant recent growth and development; * Growth of bulk semi-insulating crystals * Deep levels for realisation of semi-insulating materials * Generation and annealing of structural defects * Characterisation of semi-insulating materials * Applications of semi-insulating materials in devices The following topics, in which there is major current interest, are included in this series for the first time. * Optoelectronic integrated circuits * Epitaxial growth of semi-insulating materials This volume will be invaluable to materials scientists, physicists and device applications engineers who are interested in recent developments throughout the semi-insulating III - V materials field.
