

Safety Management Systems - IChemE

The majority of accidents in the process industries can be traced back to poor management systems. Set up a system to manage safety competently, and you are most of the way to safe operations. This book shares with others the current experiences gained by the EPSC member organisations on safety management. What makes this book different? - it is a how to and not a what you should do text, to enable companies to join the top performers in safety management systems. IChemE, the Institution of Chemical Engineers, is the center for chemical, biochemical and process engineering professionals worldwide. We are the heart of the process community, promoting competence and a commitment to sustainable development, advancing the discipline for the benefit of society and supporting the professional development of members. Some of the areas we publish in include: -Safety in the process industries - the BP Process Safety series-Consultancy for chemical engineers-Project management in the process industries-Contract management in the process industries - International Forms Of Contract series-Communication skills for engineers
