

## Waking to Beauty: Encounters with Remarkable Beings

Can horses help heal the human heart? In *Waking to Beauty*, Rosalyn W. Berne explores the extraordinary experiences that have shaped her spiritual journey. This book follows *When the Horses Whisper*, which details the author's capacity to hear and speak with horses, an unexpected gift that changed her understanding of who we are as human beings, in our connection to other beings. *Waking to Beauty* considers the early childhood origins of this capacity, and shares the realizations that have flowed from this gift. This journey moved her from an external orientation, with a theistic God dwelling somewhere out there, to experiencing the divine as present within us and with our fellow creatures. The crux of the book centers on Rosalyn's encounters with a mare named Beauty, which led her to a profound experience of God dwelling with us here on Earth. The new vision of spiritual evolution that flowed from these encounters opens profound possibilities for humanity, in its interdependence with other living species as well as the earth itself. Beauty makes it clear that human existence is in a precarious state, and that humans need to change in order to survive. But why would anyone take a horse's message seriously? Reading this book may help to provide an answer to that question. Rosalyn W. Berne, Ph.D. explores the intersecting realms between emerging technologies, science, fiction, and myth, and between the human and non-human worlds. As a university professor, she writes and teaches about engineering and technology in society and the ethical implications of technological development, often using science fiction material in her classes. In her personal life, she continues to discover the transformational nature of human-equine relationships, and offers facilitation and translation services for enhancing communication between horses and their owners. She is also the author of *Nanotalk: Conversations with Scientists*

and Engineers about Ethics, Meaning, and Belief in the Development of Nanotechnology, and the novel, Waiting in the Silence. Author Residence: Charlottesville, VA
