

# The Bartender

A man with a lifelong dedication to bartending looks upon his profession as having the elevated status of a religious order, a fraternal organization, or a secret society promoting mankind's betterment. But he finds his good will to humanity is increasingly challenged as he watches American society going in an ill-mannered and amoral direction. And when one of his inebriated customers lets something slip within his earshot - information that could be played to his personal advantage - he finds his own ethics being put to the test.
