

The Economies of China and India: Cooperation and Conflict: (In 3 Volumes)

China and India, the two largest developing countries, are developing rapidly both inside themselves and towards global markets. Are these two economies dual or dueling? This 3-volume set tries to answer this question by providing comprehensive analyses scoping varied economic issues. This volumes set covers both Chinas and Indias strategies and objectives in international governance, their bilateral and multilateral trade agreement negotiations, financial liberalization, growth prospects, rural development and agriculture, income distribution, labor market mechanism, manufacturing and competitiveness upgrading, as well as environmental and other social issues. The set collects papers (most unpublished until now) written by Chinese and Indian researchers who have rich experiences and strong backgrounds in policy analyses and are well connected to Chinese and Indian policy makers. Thus, these papers contain valuable first-hand information about Chinas and Indias development strategies. This makes this volume set an essential source of reference for China India comparisons and studies.
