

Flea Market Cash Machine

Even if you have no plans to be a seller, you should own this book. This book contains valuable skills for acquiring goods at the lowest price possible; an extremely valuable skill. As a licensed North Carolina Auctioneer, I have also included powerful strategies for auctions. I include extensive details on auctions from grab bags to the art of the table deal. This is absolutely the most informative book on Flea Market and Auction business available. Know when you buy this book, you are getting the information from someone who does this business right now, every weekend. Its not based on something I did years ago that doesnt work anymore or something I read about. The information is current, valuable, and actionable this weekend. The lessons learned in this book, would have cost you thousands of dollars in cash alone, not accounting for your valuable time. Learn from my success and failures. Learn power strategies for sourcing the right items. Get a crash course in sourcing items from onshore wholesalers, direct from China, pallets of store returns, shelf pulls, liquidation auctions, estate auction, storage locker auctions, and more. Learn to leverage common sources as well like goodwill, craigslist, salvation army, and yard sales. Experienced sellers, there is plenty in here for you as well. Are you looking to increase your profits? I show you how to make the most of your business, how to source the right items, and powerful profit strategies for when, where, and how to sell.

We are living in a very challenging world. Jobs are disappearing and the cost of living is higher than ever. Homeownership is at the lowest levels since 1967. United States debt continues to increase surpassing the United States GDP. Year after year kids are leaving college with degree in hand only to find there are no jobs available. Graduates are working at fast food restaurants with PHDs. Many people working multiple jobs

just to survive. I am a power buyer and seller, but many auctions I attend are open to the public. I still find it very concerning that many people today are buying necessity items like food, toilet paper, shampoo, deodorant, etc... at auction in small quantities. Many of these folks are older and working on a fixed income. These folks are just trying to survive and spend as little as possible. I wrote this book for everyone. This book will tell you how to sell in secondary markets to produce a full time income. This book will be no substitution for hard work and diligence in your business. However, it will give you working knowledge of the flea market and auction business including best practices for what you should be doing. Its my way of giving back, and I hope many of you read this book, and go out this weekend and start your business. Have people hand you cash all day. Find fun new products and have people excited to buy them. Learn ways to be creative and putting money in your pocket. Learn the value of items and where to get them cheaper than anyone else. Learn how to get the most out of each and every dollar. Learn how to enhance your life and have it paid for by the business. Live your life as an exciting treasure hunt, where you keep some of the treasures for yourself.
