

STRANGE SKIES, STRANGE EYES:: The Paranormal, Ufology and Everyday Magick

This book could best be described as a series of reflections and observations, a distillation if you like, on the nature of, and relationship between, the occult as we encounter it in our daily lives. This includes the paranormal in all its guises and how this impinges upon the often fractious subject of Ufology, aspects of which may in themselves be other manifestations of the paranormal. From my own investigations and researches it seems to me that there is little if any difference between any of these subjects and where any divergences do occur, they are almost certainly in how different individuals experience them.
