

The Lost World

What if dinosaurs never really died out, and are still living in a remote corner of the world? This is a recurring scenario in books and films, but Arthur Conan Doyle got there first with his 1912 novel, *The Lost World*. The hot-tempered Professor Challenger has organized an expedition to the wild jungles of South America. Together with a fellow scientist, a hunter, and a journalist, he makes his way to a volcanic plateau where they encounter creatures left over from another age. Will they be able to survive in this terrifying ancient world? Exciting, imaginative, and humorous from start to finish, *The Lost World* is a treat for readers of all ages.
