

Supernatural Intervention in My Life

Throughout life, most of us have heard about supernatural events both visible and invisible. We have become fascinated with the unexplainable. For example, the sounds of footsteps; when there is no one there. There are dreams that are so real that you find yourself reliving them in reality. These are situations where the hair stands up on your arms and neck right as something dramatic is about to occur. All these are signs of the supernatural. Everyday people across the world experience the supernatural and they are not aware of what is happening to them. I would like to share my story with millions across the world. Maybe it would enlighten those who wonder why. To all the people that read this book just understand one thing; you are not alone. The Supernatural world has been present all throughout history. Even the Bible speaks of the spirit world. It is true that we have an alternate universe, as some would refer to this realm of existence. Most of us have experienced *deja vu* at one point in life. You feel that you have been here before but you know physically you've never been. This is called an Outer Body Experience. You see as we sleep our inner man is free to fly through the supernatural realm. This realm will reveal pictures of each individual's future. So often, we are too preoccupied to realize that in many situations that the Lord has warned us of what is to come. We need to become sensitive to the supernatural in order to benefit from its power.
